1. During the past year the Hungarian infantry regiment in Budapest received some bazookas of Soviet fabrication. The regiment used these weapons in training, shooting, and manoeuvres on the training grounds near Hajduhadhaz and Orkény. After these exercises, it was decided that all infantry units would be armed with these weapons. At the present time only a small number of battalion escort companies is armed with them.
 2. This bazooka is really a perfected model of the German "Panzerfaust" and "Panzerschreck". Its range is 400 meters and it is transported by trucks or by horses.
 3. According to some reports, these bazookas are now being made in Hungary, in the Manfred-Weiss factory in Csepel.
